## SUMMARY

---

I am a detail-oriented and passionate writer with over six years of experience developing clear and concise documentation for diverse audiences. I combine my business and marketing background to create user-focused content tailored to clients' needs and experience levels. My expertise includes writing product documentation, API references, SDK documentation, release notes, README, quick start guides, blogs, context-sensitive help, and curriculum content. Proficient in docs-as-code workflows, developing templates and style guides, and creating flowcharts and infrastructure diagrams. Additionally, I possess excellent research, editing, and proofreading skills, am an expert in various documentation tools, and have a meticulous eye for good documentation style and user experience design.

## EXPERIENCE

---

### Documentation Editor

Hilton Software

January 2019 - Present, Coral Springs, FL

- Developed standardized templates and style guidelines that decreased production time and improved new hire onboarding efficiency.
- Revamped existing product documentation to comply with new style guidelines, leading to improved readability across mediums.
- Manage five user manuals tailored for different platforms: software (iOS, Android, Windows) and server (macOS, Windows). Each manual ranges between 100-300 pages, ensuring adherence to editorial standards while maintaining conciseness.
- Authored internal RESTful API documentation using docs-as-code workflow and documentation tools such as ReadMe, Swagger, and Postman.
- Write sample code in C# and Python SDK to interact with REST API.
- Create custom testing suite with Postman to document APIs, create test cases, and test API calls, requests, and responses.
- Work collaboratively with cross-functional teams to research and analyze documentation requirements, ensuring accuracy and clarity of products.
- Create and maintain contextual help and What's New pages using HTML/CSS integrated within the application's user interface. Utilize GitHub and GitLab for version control.
- Utilize Agile development methodologies with experience working in Agile teams.
- Create a library of knowledge base articles embedded on the product website that includes FAQs, troubleshooting suggestions, guides, best practices, and other topics using WordPress.

### Marketing Coordinator

- Written 40+ award-winning submissions leading to significant recognition from industry awards such as the Edison Award, Stevie Award, DGAA, Federal 100, GCN dig IT, CEO World Awards, BIG Awards, Golden Bridge Awards, Sustainability Award, W3, and Appy Awards.
- Produce curriculum videos and other visual media to demonstrate how our products work, highlight their key features, and showcase their benefits. The production of video creation fostered an environment to learn movie editing software such as Adobe Premiere Pro and iMovie.
- Produce resources for informational marketing including flyers, product teasers and release videos for quarterly releases.

## EDUCATION

---

### Bachelor of Business Administration

Florida Atlantic University • Boca Raton, FL • 2025

- Major in Hospitality and Tourism Management
