

DONNA MAE ISIP

Technical Writer | Developer Documentation

South Florida (Open to Remote / Relocation) | (561) 528-1993 | info.simplydonnamae@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Technical Writer with 7+ years of experience producing developer-facing documentation for cloud and API platforms. Specializes in OpenAPI/Swagger references, Docs-as-Code workflows, and Kubernetes/AWS infrastructure documentation. Partners directly with engineers to validate code samples and test API behavior, translating distributed systems into documentation that measurably reduces support load and speeds developer onboarding.

EXPERIENCE

Technical Writer / Editor — Hilton Software

Jan 2019 – Present | Coral Springs, FL

- Own end-to-end developer documentation across cloud-based platforms using Docs-as-Code workflows (Markdown, Git), cutting review/publish cycle time and improving cross-team content consistency.
- Design and standardize REST API and SDK reference documentation in OpenAPI/Swagger, reducing partner integration support tickets by streamlining endpoint and schema clarity.
- Document Kubernetes cluster architecture, services, and deployment workflows for engineering teams, closing internal knowledge gaps and shortening new-hire ramp-up time on containerized systems.
- Partner with engineers to write and validate Python and C# code samples against live APIs, catching integration errors before release and improving first-call documentation accuracy.
- Build and maintain Postman collections to test REST endpoints pre-release, surfacing inconsistencies that improved API reliability across multiple product releases.
- Maintain 100–300 page manuals across iOS, Android, Windows, and macOS, ensuring a single consistent voice and structure across four platforms simultaneously.
- Create architecture diagrams and workflow visuals (Lucidchart, Figma) that make complex distributed-systems interactions accessible to both engineers and non-technical stakeholders.
- Establish documentation standards, templates, and style guidelines adopted team-wide, improving authoring speed and content scalability as the docs library grows.

Technical Writer — LKW Real Estate

May 2018 – January 2019 | West Palm Beach, FL

- Supported the launch of a real estate brokerage by organizing contracts, client-facing documents, and transaction records.
- Collaborated with agents to ensure materials were accurate, compliant, and consistent.
- Assisted with property showings and client interactions while streamlining documentation workflows.

INDEPENDENT PROJECT

Weather App — Python / HTML (github.com/DmaeX/Donna-Mae-Weather-App)

- Built a weather application integrating external REST APIs to fetch and display real-time data by user input or geolocation. Used as a hands-on test environment for the same API consumption patterns documented at work.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Pearson VUE, 2024

SKILLS

Documentation & Tools: Markdown, Git, GitHub, GitLab, OpenAPI/Swagger, Postman, ReadMe, Docs-as-Code, structured authoring, static site generators, Confluence, WordPress, Lucidchart, Figma

Cloud & Infrastructure: AWS (EC2, S3, Lambda, ECS, EKS, VPC, CloudFormation), Docker, Kubernetes, container orchestration, cloud networking

Programming: Python, C#, Bash, YAML, HTML/CSS

EDUCATION

Bachelor of Business Administration — Florida Atlantic University, Boca Raton, FL (2025)
